

MW017 Measuring Wheel

Model Type: MW017

Measuring Range: 0.05 - 99999.9m (about 100 km)

Features:

1. Sturdy measuring wheel with kickstand;
2. Water and dust proof: IP54;
3. Flexible style pole: it is able to adjust the height with One-touch-lever on the pole;

4. Perimeter of the wheel: 0.6m;
5. Wheel diameter: 190mm;
6. Memory function: with only pushing a button, it can keep the measured value maximum to 5 memories and can recall the memory freely and show it in the LCD when it is necessary;
7. Measuring tolerance range: $\pm 0.5\%$
8. LCD back light function: easy to confirm the measured value due to having the LCD on the grip;

9. Automatic power off: about 5 minutes;
10. Continuous operating time: about 30 hours;
11. Power supply: 3x AAA dry cell batteries

Panel Function:

1. M/ft switch button
2. SM button: memory function
3. RM button: recall the memories;
4. 0-set button: return to zero
5. ON/OFF button

Operating Instruction:

1. Put in 3 x AAA dry cell batteries. "0" showed on the LCD;
2. Close the stand and adjust the pole to the suitable height, then lock the pole;
3. Let the pointer on the wheel point directly to the start point.
4. Press the "0-set" button;
5. Push the measuring wheel going ahead to measure the length;
6. During the measuring process, you can press the "SM" button to store the value (Max. five memories);

Attention: When it shows "0" on the LCD, please don't back move.
